

FUEL STATION MONITORING SYSTEM

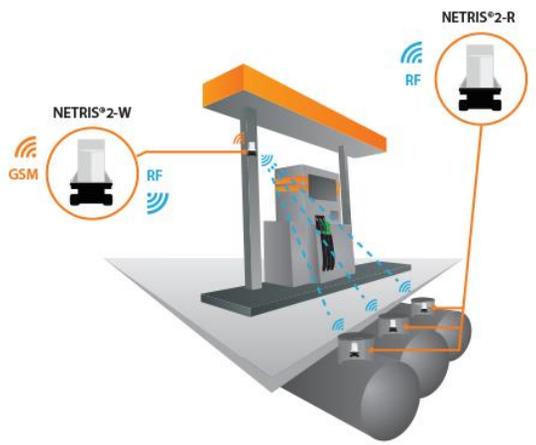

ABOUT US

Potentia with over 25 years of rich experience for in Oil & Gas, Fertilizers, Power & Energy sectors of Pakistan can help the fuel stations, fuel storage tanks, fuel vehicles with reliable & cost effective IOT based monitoring systems complying to the requirements of client application.

OUR OFFERINGS

Potentia design and supply the complete range of products & solutions explosion protected required for a standard fuel station monitoring system, including:

- Fuel Level Sensors
- Wireless Connectivity Gateways
- IOT (cloud) Based Platform for REAL-TIME Monitoring of Various Parameters

WHY OUR SOLUTION?

The IOT market in the oil & gas industry alone is expected to see 1,000,000 new device installations per year from 2023 With our international experience and growing portfolio, we are well positioned to consolidate our leadership position.

ABOUT SOLUTION

The user-friendly web portal is the interface between the telemetry units and your logistic solution. It allows you to easily access, view, analyze and export tank-level data via the internet. It can also initiate alarms, if a low or high tank level is reached, allowing you to take immediate action

- Secure access through a standard internet browser
- Easy data export into any delivery planning tool
- Automatic alarms via SMS or email
- Historical data
- Data presented according to company structure
- Search and filter functions
- Data export in both .xls and .csv format
- Additional information such as consumption & predicted order date
- Interactive tank-site maps
- One-click Inventory

The Mobile version of this platform is a very practical way to quickly and simply view your stock and consumption, while on the go. It is compatible with any mobile phones and tablet browsers.
