

## WELL HEAD VALVES ASSEMBLY

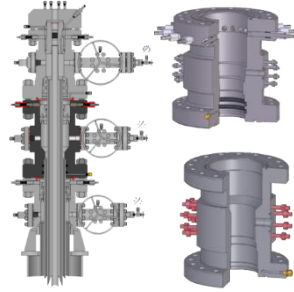

### ABOUT US

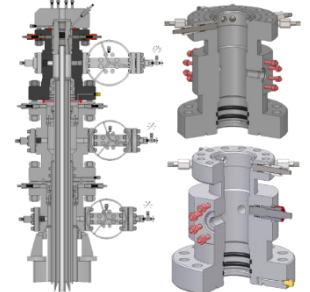

Potentia with over 25 years of rich experience for execution of projects in Oil & Gas, Fertilizers, Power & Energy sectors have reliable, & trusted API certified Well Head Valves along with Casing , Tubing Head to provide the complete Wellhead assembly package.

**Casing Head**, lowest part of the wellhead assembly, almost always connected to the surface casing string, Supporting the remaining parts of the wellhead and completion equipment.

**Casing Spool**, a component that allows for an additional string of casing to be set in the well. Depending on the casing program for the well, there can be more casing spools

**Tubing Head**, the top spool on a surface wellhead, typically installed over the last string of pipe suspended in the well, the production casing

In order to complete the set, we provide you with **Casing hangers**, allowing for casing to be set in the well bore during the drilling phase of an oil or gas well and **Tubing Head Adapter**, allowing for Christmas tree or other completion equipment to be connected to the tubing head.

#### LOWER MASTER VALVE

Gate valve, to limit the amount of flow into the Christmas tree from the wellhead.

#### UPPER MASTER VALVE

Failsafe measure in case the lower master valve fails

#### KILL WING VALVE

For injection of corrosion preventers like methanol into the well

#### Production Wing & Choke Valve

Prevents injection to well under maintenance by control flow volume and pressure

#### Swab Valve

Manual operated valve providing direct for well interventions
