

# WELLHEAD MULTIPHASE FLOW METERING SOLUTION

## APPLICATION

- Exploration, appraisal, and production well testing
- Well cleanup optimization
- Production and fiscal allocation
- Production trending
- Artificial lift system optimization
- Flow measurements in slugs, emulsions & heavy oil

## ABOUT US

Potentia with over 25 year of experience in Oil & Gas sector can help exploration companies through its advanced and latest technology to simultaneously measure Oil, Gas and Water phases of the production inline without the need for prior separation. The breakthrough **SOLUTION** requires minimal data inputs & In-Situ calibration

## FEATURES

- Repeatable, highly accurate measurements
- Exceptional dynamic response
- No need for separation and flow calibration
- High-frequency data acquisition
- Archived database and automatic reports

Non-Radioactive

No PVT data requirement

'Set-and-forget' operation.

Low OPEX costs.

## Comparison with Conventional

Increased Flexibility against a traditional Separator

Substantial Time Savings (No Stabilization Required)

Replace separator when well production is not as separator size

Possibility of continuous Metering

Total uncertainty lower than the conventional system
